

Site name :Agro-Vision

User Pages

Multi-language Support

- English / French / Arabic

1. Home

Content:

- Project title
- An animated video about farming, fields, drones, and a farmer using a computer is placed on the main user interface and plays automatically.
- System description
- “Get Started” button

2. Authentication (Login / Register)

Content:

- Login
- Sign up
- Password recovery

3. Dashboard

Essential page

Content:

- Number of analyses
- Latest results
- Status (Processing / Completed)

4. Upload Page

Content:

- Upload multi-temporal & multispectral images
- Display:
 - Image name
 - Date
 - Number of images

Processing

Content:

- Progress bar
- Processing status
- Simple logs (optional)

Results (Most Important)

Visualization:

- Original vs Classified image
- Clickable Spectral Signature

Classification Results:

- Crop
- Variety
- Confidence
- As a result of monitoring growth stages

Map:

- Color-coded crop map

Download:

- **PDF Report**
- **print**

5. Reports Page

Content:

- **Previous reports**
- **Agricultural recommendations**
- **The farmer's observation depends on the condition of his crop.**
- **PDF download**

6. Notifications Page

Content:

- **Ready results**
- **Agricultural alerts**
- **System updates**

7. Settings Page

Content:

- **User information**
- **Change password**
- **Preferences**

8. Messages Page (Important Addition)

Content:

- **Chat with Admin**
- **Send:**
 - **Text messages**
 - **Images**
- **Conversation history**

9. Contact / Support Page

Content:

- **Form:**
 - **Name**
 - **Email**
 - **Message**

Function:

- **Sent to Admin dashboard**
- **Copy sent to user's email**

Admin Pages

1. Admin Dashboard

Content:

- **Number of users**
- **Number of analyses**
- **Best-performing model**
- **System activity**

2. User Management

- **View users**
- **Edit / Delete**
- **Activate / Deactivate**

3. Data Management

- **Manage images**
- **Manage results**
- **Delete data**

5. Analysis Monitoring (Optional)

- Processing
- Failed
- Completed

6. Reports Management

- View reports
- Download
- Delete

7. Notifications Management

- Global notifications
- Personalized notifications

8. Messages Management

- View user messages
- Reply to users
- Archive conversations

9. Email System

Functions:

- Send automated emails
- Email notifications
- Send replies to users

(Using SMTP or Gmail API)

10. Admin Settings

- System configuration
- Email settings

The system should include:

1. Frontend

- All pages (Home, Dashboard, Upload, Results, Map, Reports, Messages, etc.)

2. Backend (API)

- User authentication
- Analysis management (Processing, Completed, Failed)

3. AI Integration

- Connect CNN + LSTM model
- Process multispectral & multi-temporal images
- Return classification results

4. Database

- Users, Images, Analyses, Results, Messages

5.Reports

- Generate PDF reports

6.Messaging System

- Communication between user and admin

7.Email System

- Notifications and responses via email

8.Admin Panel

- User management
- Analysis monitoring
- Reports management

9.Security

- Role-based access (User/Admin)
